

Dear Sir/Madame,

Dinamica Generale expands its range of software suite with the new Pegasus Trace: load supervisor software for a perfect control of the load working data.

Pegasus Trace is a software designed to collect and process the data collected from the on board weighing system Pegasus 2.

The Pegasus Trace will be available for all Pegasus2 on board weighing systems, **even those already installed** by Dinamica Generale, for more details contact our sales Department.

Main features of Pegasus Trace:

- ✓ Customer Management;
- ✓ Components Management;
- ✓ Single Load History;
- ✓ Total Load History;
- ✓ Amount for customer or component;
- ✓ Detailed Excel or PDF Report.

In order to simplify the operator's work, Customers and Components can be written using the Pegasus Trace and transferred to the weighing indicator Pegasus2 or viceversa.
