

TRACEABILITY OF HARVESTING PROCESS

Dinamica Generale offers a wide range of **weighing systems** for agricultural applications such as grain carts, forage wagons, trailers and manure spreaders. For all machines, we supply load sensors, weight displays and APPs.

MAIN BENEFITS FOR GROWERS AND CONTRACTORS

1. Know the exact weight of grains and forages while harvesting
2. Measure crop yields
3. Transfer data to Field Trace Sw to manage precision farming data
4. Increase your profitability thanks to real time data traceability
5. Dinamica Generale solutions can be installed in every kind of machines

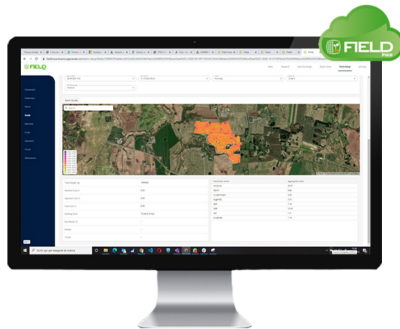

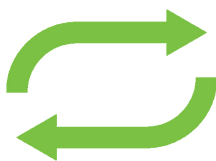

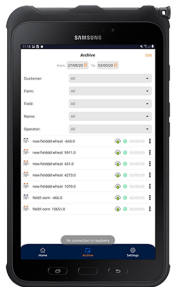

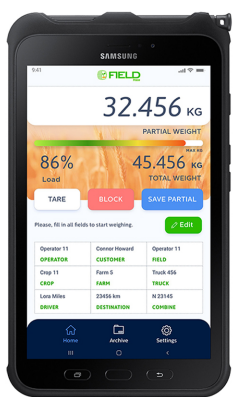

Precision farming technology gives greater control over your fields

Field Scale app allows to monitor the complete harvest process.

Field Scale is a tablet and smartphone-based app that records and tracks weighing of harvested grain and forage.

Available for grain carts and forage trailers, Field Scale app records weight, GPS position, date & time of each load and provides load tracking details from field to destination/stock.
