# Learn from Industry Experts at 2009 Education Seminars

Efficiency and profitability take precedence at daily sessions

Industry experts will share their experience, knowledge and ideas as part of World Dairy Expo's 2009 Education Seminars to help make your dairy operation and your clients' operations more profitable and efficient. Again this year, 10 free seminars will be offered during the week at the Alliant Energy Center. There is valuable information for all sizes of dairies, including presentations on popular media communications, alfalfa technology, integration of radio-frequency identification (RFID) tags, employee management, genomics, raising replacements, crisis management, manure management, price volatility and energy efficiency.

Continuing education credits can be earned for members of the American Registry of Professional Animal Scientists (ARPAS) and the American Association of Veterinary State Boards—RACE program\*. Credits that can be earned for each seminar are listed on the following pages.

There will be two seminars each day, Tuesday through Saturday, in the Mendota 2 meeting room, located in the Exhibition Hall. Seminars are structured as 45-minute presentations with time for questions and discussion. Accelerated Genetics, Acme Engineering & Manufacturing, AgStar Financial Services, APC Inc., Arm & Hammer Animal Nutrition, Dairy Management Inc., Ecolab, Jamesway Farm Equipment, Syngenta and the Wisconsin Livestock Identification Consortium are the sponsors of this year's seminars. Following is a brief synopsis of the material that will be covered in each presentation.

*\*Seminars were reviewed and approved by the AAVSB Registry of Approved Continuing Education (RACE) program. Please contact the AAVSB RACE program at [racc@aaavsb.org](mailto:racc@aaavsb.org) if you have any comments or concerns regarding the seminars' validity or relevance to the veterinary profession.*

AAVSB RACE provider—World Dairy Expo, #395.
